

SOFTSCAPE

PET SCREEN SOLUTIONS

abrc

PRIVACY. PERFORMANCE. CHOICE.

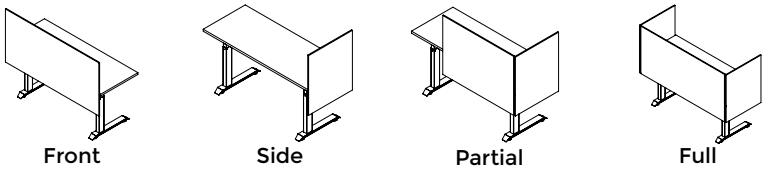

Softscape is BRC's acoustic PET solution designed to improve privacy and reduce noise in open and shared work environments. Engineered to minimize reverberation and dampen sound, Softscape helps create quieter, more focused spaces across open offices, collaboration areas, private spaces, and educational settings. Its tackable surface adds everyday functionality while maintaining acoustic performance and durability.

Designed with flexibility in mind, Softscape is available in two distinct profiles, a clean right-angled straight option and a softer curved rounded-edge design, giving specifiers greater control over both function and aesthetics. Offered in 10 colour options and manufactured using 60% recycled PET content, Softscape delivers a versatile, sustainable solution for managing acoustic privacy.
