

STEP 1: Ensure the Gallery panel is grooved for glass as shown below.

STEP 2: Secure the gallery panel in an upright position in a dust free environment

STEP 3: Apply a bead of clear adhesive into the groove. Carefully slide glass into groove ensuring it is fully seated. Wipe away excess clear adhesive before curing occurs.

STEP 4: Wait until clear adhesive is dry and glass is secure before installation of panel.

NOTES:

- 1) BRC panels are grooved for 6mm tempered glass only. Failure to use this thickness of glass will make the glass wobbly and not secure in the groove.
- 2) Use enough clear adhesive in the groove to ensure clear adhesive binds the glass on the bottom and all sides.
- 3) CUSTOMER INSTALLED GLASS IS THE SOLE RESPONSIBILITY OF THE CUSTOMER AND INSTALLER. BRC SPECIFICALLY DECLINES ANY RESPONSIBILITY OR LIABILITY FOR INSTALLATION ISSUES, WORKMANSHIP, FUNCTIONALITY AND WARRANTY OF PRODUCT IF THE CUSTOMER INSTALLS THEIR OWN GLASS OR OTHERWISE MODIFIES THE PRODUCT IN ANY MANNER.

# SAFETY NOTICE

---

## **Instability Hazard**

Mobile items on casters such as flip top, personal and movable tables of any type and storage items of any type may present an instability hazard if not secured correctly while in use or in storage. Flip top tables or training tables of any type, are inherently more unstable when folded. BRC provides the following guidelines & warnings when using mobile products:

- Lock casters immediately after moving. Do not leave the casters unlocked when in use or in storage.
- Motion may increase the instability of any item with casters. If the wheels hit an obstruction the table's forward momentum often causes overturn, especially if the item is not equipped with wheel extensions. Exercise strong caution while moving these items.
- Use caution when abrupt level changes in the floor are present (such as a doorway or room threshold) as caster failure or tipping may result.
- Do not stand, sit or lean on mobile items for support. They are not intended for this use and personal injury or property damage may result.
- Mobile units that feature height adjustable elements must be lowered to the minimum compressed height when moving to prevent instability. It is also recommended the user remove all computer equipment or other accessories to prevent possible weight imbalance or damage to equipment.
- Failure to follow the guidelines above may result in property damage or personal injury.

## **Heavy Load**

- This product must be anchored to wall to ensure stability & safety.
- It is the owner and installers responsibility to ensure that the wall type and construction is of sufficient strength to carry the loads of any wall mounted products and their contents.
- Failure of the wall and anchors to support all imposed loads may result in property damage or personal injury.
- BRC can provide size and empty weight of its products only. As wall blocking is considered a building construction process, BRC cannot provide recommendations in this respect and cannot be responsible for damage or injury that may occur as a result of improper installation and/or blocking.

## **Load Bottom Drawer First!**

- Operate one drawer at a time.
- Unit may tip if loaded incorrectly.
- Unit should be attached to a wall or other furniture to reduce tipping hazard.
- Always load the heaviest files in the bottom drawer.
- Failure to follow the guidelines above may result in property damage or personal injury.
