

WASTE & RECYCLE CABINETS

abrc

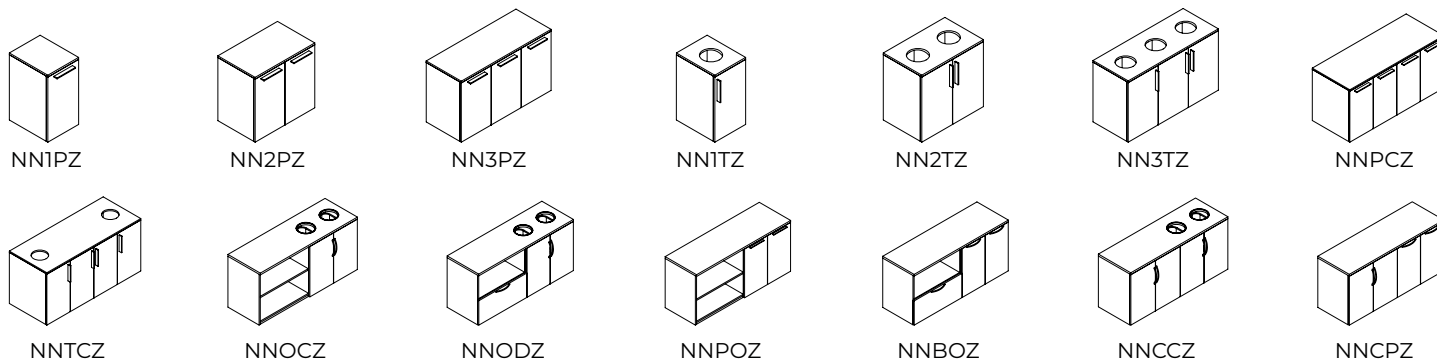

OVERVIEW

To protect the environment and reduce office clutter, we are now offering Waste and Recycling units that will keep your garbage and recycling bins neatly tucked away in a modern, clean-lined designed cabinet. BRC's Waste and Recycling units can be built into low credenzas, serving credenzas, or constructed as a standalone unit for a centralized location in your office.

Dispose of your recycling or garbage through a closed door unit with a slot to pass paper through or a circular counter top opening with a stainless steel ring. Add a lock to the door for the security of confidential documents to be shredded. All units come with a bin in black or blue. BRC also offers a PPE station that can be installed nearby to sanitize your hands and keep staff healthy.

Specs

CONFIGURATIONS

DETAILS

- All exposed edges are manufactured 2mm thick edging
- Units have one inch of leveling
- Locks and decals are not standard on recycle units.
- Grain direction is horizontal on tops and shelves while vertical for gables and drawer fronts.
- Standard casegoods construction is 3/4" thick lowpressure laminate (LPL).
- All low-pressure laminate panels are 45lbs density and finished both sides.
- Tops are available with three core/surface material options of 3/4" (19.4mm) and 1" (25.8mm) LPL or 1-1/8" (27mm) HPL.
- Pull out and open top units include removable black or blue plastic Rubbermaid bin
- Open configurations include top ring. Ring is 8" and stainless steel.
