

LOCKER BANKS

abrc

MODULAR . EFFICIENT . FLEXIBLE

Expand your locker solutions with BRC Locker Banks, designed for larger locker applications requiring greater efficiency and flexibility. Multiple locker columns are combined into a single unit with shared construction, reducing redundant components while providing a scalable approach to banked locker applications. Multiple bank sizes, heights and door configurations provide flexibility across a range of applications, while new in-place levelling and coordinated finishing options support efficient installation and a clean, finished appearance.

Specs

SIZES

- Width - 24", 36", 48"
- Depth - 15"
- Height - 42", 48", 54", 60", 66", 72"

COLOURS

Available in all standard laminate finishes for locker doors and applicable add-on components. Locker body is white. See [website](#) for full laminate offering.

CERTIFICATIONS

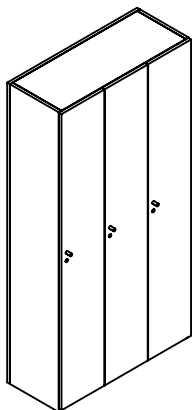

DETAILS

- Available as 2-, 3- and 4-column locker banks
- Multiple locker columns are combined into a single unit with shared interior gables, reducing redundant components compared with creating the same run from individual locker units.
- New in-place levelling system allows installers to access and adjust the levelers while the locker bank remains upright, eliminating the need to lay the unit down to make adjustments
- Available in 42", 48", 54", 60", 66" and 72" heights
- One- and two-door configurations at all heights; three-door options at select heights
- White body construction with specified finish options for fronts
- Multiple locking options available
- Knob and optional vent handle available
- Optional PET locker organizer and boot liners available
- PET locker numbers available to provide a simple way to identify individual locker compartments
- New laminate surrounds, and slanted tops available to support finished installations
